FOREWORD

The Indian Society for Inborn Errors in Metabolism (ISIEM) and the ISIEM 2019 Organizing Committee seeks great pleasure in inviting you to the 5th National ISIEM Conference which is to be held in this historic city of Pune from 18-20 January 2019.

The Organizing team (from Pune and Mumbai) have put together a wonderful academic feast for its delegates with many speakers of International and National repute delivering talks to highlight the importance of detecting and treating IEMs in our country where these disorders are quite common but often missed. It must be emphasized that laboratory testing for IEMs has now become more available and affordable. We are now better equipped to treat metabolic conditions because of the easier accessibility to metabolic medications and special medical foods. But the mainstay of managing IEMs is their early suspicion, correct interpretation of metabolic derangements, giving the accurate diagnosis and then instituting proper management. This conference is sure to touch upon all these basic aspects through a well-crafted Master Class and Scientific program. In accordance with the theme the conference will sail you through various topics of clinical interest and shall discuss the advances in this very important field. Attending the conference will surely benefit the delegates from where they will take back 'practical knowledge' on IEMs which they can apply in their clinics

Pune has been an educational and cultural hub for many centuries, and is now a melting pot with people from all around the globe coming here to study or work. The city and its vicinity offer a wonderful and varied tourism experiences for those in quest of history, spirituality, adventure and relaxation. The great climate and hospitality of this city will surely make this trip a refreshing experience.
