ONE STOP SOLUTION FOR **REPRODUCTIVE HEALTH NEEDS...**

Pre Conception

Carrier Screening 420 Genes

During Pregnancy

First Trimester Screening

- Dual marker screening: β HCG , PAPP-A (Technique: TRACE, DELFIA, CLIA/ECLIA)
- Dual + Pre-eclampsia risk (β HCG, PAPP-A, PIGF)
- MBFD/NIPT (min 10 weeks)

Second Trimester Screening

- Triple marker Screening • MBFD/NIPT
- Quadrapule screening (AFP, β HCG, UE3, Inhibin A)

Third Trimester Screening

- MBFD/NIPT
- Pre-eclampsia Predictor (sFLT-1: PIGF RATIO) panel

Prenatal Diagnostics

- Karyotyping • FISH •MLPA,
- Chorosomal microarray (CMA), Sanger sequencing

Post Delivery

Postnatal Diagnostics

- Hemoglobinopathy/NBS • Newborn screening
- Biochemical tests • TMS • Exome sequencing
- Karyotyping • FISH • CMA
- Sanger sequencing

Infertility/ Recurrent Pregnancy Loss/IVF

Recurrent Pregnancy Loss

- BOH/Autogen panel • APLA • Karyotype
- Carrier screening • CMA • Infertility comprehensive panel
